

Contents

Chapter 1 Logic and Techniques of Proof

1.1	Logical Connectives	1
1.2	Tautology and Contradiction	10
1.3	Quantifiers	12
1.4	Some Basic Laws of Logic	14
1.5	Techniques of Proof	16
1.6	Further Techniques of Proof	20
	<i>Exercise 1</i>	27

Chapter 2 Sets and Functions

2.1	Basic Concepts and Notations of Sets	29
2.2	Relations between Sets	32
2.3	Operations on Sets	34
2.4	Algebraic Laws of Set Operations	37
2.5	Classes of Sets	41
	<i>Exercise 2 (A)</i>	42
2.6	Cartesian Products	43
2.7	Relations	45
2.8	Properties of Relations on a Set	47
2.9	Functions	48
2.10	Visualizing Functions	50
2.11	Properties of Functions	50
2.12	Functions Acting on Sets	52
2.13	Composition	55
2.14	Inverse Functions	56
	<i>Exercise 2 (B)</i>	59

Chapter 3	Real Number System	
	3.1 Peano's Axioms	61
	3.2 Real Number System	64
	3.3 Field Axioms	64
	3.4 Order Axioms	67
	3.5 Supremum and Infimum	71
	3.6 Completeness Axiom	75
	3.7 Properties of the Supremum and Infimum	77
	3.8 Countable and Uncountable Sets	83
	3.9 Cardinality	90
	<i>Exercise 3</i>	95
Chapter 4	Point Set Topology	
	4.1 Basic Properties of Distance	97
	4.2 Open Sets and Closed Sets	98
	4.3 Properties of Open and Closed Sets	102
	4.4 Adherent Points, Limit Points	105
	4.5 Bolzano-Weierstrass Theorem	109
	4.6 Closed Sets and Adherent Points	111
	<i>Exercise 4</i>	114
Chapter 5	Sequences of Real Numbers	
	5.1 Convergent Sequences	115
	5.2 Limit Theorems	123
	5.3 Monotone Sequences	129
	5.4 Cauchy Sequences	132
	5.5 Subsequences	136
	<i>Exercise 5</i>	140
Chapter 6	Series of Real Numbers	
	6.1 Basic Concepts	141
	6.2 Series of Nonnegative Numbers	146

6.3	Alternating Series	154
6.4	General Series	156
	<i>Exercise 6</i>	157

Chapter 7 Limits and Continuity

7.1	Limits of Functions	159
7.2	Limit Theorems	168
7.3	One Sided-Limits	171
7.4	Continuous Functions	173
7.5	Combinations of Continuous Functions	179
7.6	One-Sided Continuity	180
7.7	Discontinuities	182
7.8	Continuity and Inverse Images	183
7.9	Continuous on a Closed and Bounded Set	185
7.10	Uniform Continuity	190
7.11	Monotone and Inverse Functions	196
	<i>Exercise 7</i>	199

Chapter 8 Differentiation

8.1	Derivatives	201
8.2	Rules of Differentiation	207
8.3	Mean Value Theorems	209
8.4	Monotone Functions	217
8.5	Taylor's Polynomials	223
	<i>Exercise 8</i>	227

Chapter 9 Integration

9.1	Upper and Lower Sums	230
9.2	Riemann Integrals	234
9.3	Conditions of Integrability	238
9.4	Algebraic Properties of Integrals	242
9.5	Alternative Approach to Riemann Integrals	250

<i>Exercise 9A</i>	253
9.6 Fundamental Theorems of Calculus	254
9.7 Integration by Parts and by Substitution	259
9.8 Mean Value Theorems of Integral Calculus	261
<i>Exercise 9B</i>	264
Answers and Hints	266
Bibliography	294
Index	296
